

# Class 1: Introduction

## Table of Contents / Agenda

1	Introduction to Org-Coursepack Quickstart guide	1
2	New section	1

## 1 Introduction to Org-Coursepack Quickstart guide

Content for this section here.

## 2 New section

### 2.1 Lists

Obviously you cannot use `*` to specify a list, but otherwise Org mode uses a typical syntax for lists. For example,

- List
  - Nested list item 1
  - Nested list item 2

1. Numbered list

### 2.2 Math

You can directly input  $\text{\LaTeX}$  math in Org mode. For example,

$$\cos(2\theta) = \cos^2 \theta - \sin^2 \theta$$

### 2.3 Slide split

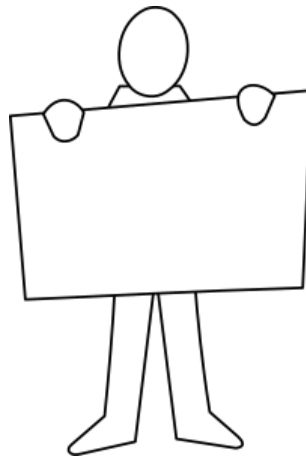

Users can put `#+REVEAL: split` to split a slide. For example,  
This line will be shown in a new slide.

## 2.4 Fragmented Contents

- This list
- is fragmented
- in reveal.js slides

## 2.5 Local Images

Local images can be included in this way:

## 2.6 Web Images / Hiding Contents

Remote images can be included by directly using its URL.

However, it only works for HTML output - for  $\text{\LaTeX}$  an local image is needed.
