Class 1: Introduction

Table of Contents / Agenda

1   Introduction to Org-Coursepack Quickstart guide

Content for this section here.

2   New section

2.1   Lists

Obviously you cannot use $\star$ to specify a list, but otherwise Org mode uses a typical syntax for lists. For example,

- List
    - Nested list item 1
    - Nested list item 2

1. Numbered list

2.2   Math

You can directly input LATEX math in Org mode. For example,

$$\cos(2\theta) = \cos^2\theta - \sin^2\theta$$
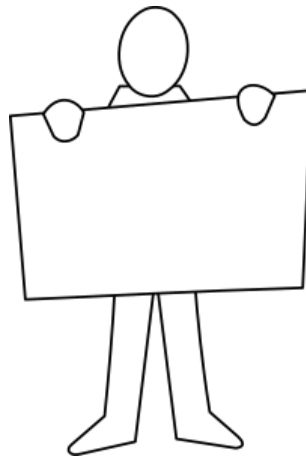

2.3   Slide split

Users can put `#+REVEAL: split` to split a slide. For example,
    This line will be shown in a new slide.

2.4   Fragmented Contents

- This list

- is fragmented

- in reveal.js slides

2.5   Local Images

Local images can be included in this way:

2.6   Web Images / Hiding Contents

Remote images can be included by directly using its URL.

However, it only works for HTML output - for LATEX an local image is needed.

(This sentence is not shown in HTML output.)
